About the Society

The Society was founded in 1967 with the aim of promoting the advancement of earth sciences particularly in Malaysia and the Southeast Asian region.

The society has a membership of about 600 earth scientists interested in Malaysia and other Southeast Asian regions. The membership is worldwide in distribution.

For enquiries about the Society, e.g. membership, annual dues and publication, please write to:

PREFACE

This Bulletin 32 is the 7th Special Issue in the Society's Bulletin series dedicated to papers on Petroleum Geology. The main source of papers for this series is the highly successful Annual Petroleum Geology Seminars organised by the Society. This annual get-together, for those interested and involved in the geology and exploration of petroleum resources in the Southeast Asian region, has continued to be the premier annual petroleum geology seminar in the region.

This Special Issue on Petroleum Geology Vol. VII (Bulletin 32), contains 16 papers, 13 papers were presented at the Petroleum Geology Seminar 1991, held on the 26 & 27 November 1991 at Shangri-La Hotel, Kuala Lumpur.

Bulletin 32 marks the first issue that formatting by desktop publishing (DTP) up to the final proof stage is done exclusively on the Society's own computer. The Society is indeed grateful to Ng Tham Fatt and Fan Ah Kwai for their painstaking efforts in improving the quality of the Society's publications.

The Society is indeed grateful to all the authors of papers that make up this volume, the many donors for their valuable financial contribution to the Society's Publication Fund and PETRONAS for the approval to publish the papers that need their clearance.
